

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

10 credits	52.5 h + 7.5 h	Q1
------------	----------------	----

Teacher(s)	Degrande Céline ;Drewes Marco ;
Language :	English
Place of the course	Louvain-la-Neuve
Main themes	This teaching unit is an introduction to quantum field theory. After a historical introduction, the main focus lies on quantum electrodynamics.
Aims	<p><b>a. Contribution of the teaching unit to the learning outcomes of the program (PHYS2M and PHYS2M1)</b> 1.1, 1.2, 1.6, 2.1, 2.5, 3.1, 3.2, 3.4, 4.1, 8.1, 8.2.</p> <p><b>b. Specific learning outcomes of the teaching unit</b></p> <p>1 At the end of this teaching unit, the student will be able to :</p> <ol style="list-style-type: none"> <li>1. put the development of modern particle physics into a historical perspective ;</li> <li>2. quantize photon and electron fields ;</li> <li>3. compute elementary processes in quantum electrodynamics.</li> </ol> <p>----- <i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Evaluation methods	<b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b> Oral exam, partly based on the project report.
Teaching methods	<b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b> Lecture, tutorials, integrative project.
Content	Historical introduction Relativity and quantum mechanics Representations of the Lorentz group Quantization of photon and electron fields Quantum electrodynamics
Bibliography	Notes sur la genèse de la théorie quantique des champs (1897-1947). // Written notes on the genesis of quantum field theory (1897-1947). Mandl and Shaw – Quantum Field Theory (Chapters 1 to 10). Peskin and Schroeder – An Introduction to Quantum Field Theory (Part I).
Faculty or entity in charge	PHYS
