

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

10 credits	120.0 h	Q1
------------	---------	----

Teacher(s)	Fache Dimitri ;Van Overstraeten Eric ;Verschuere Adrien ;Wilboux Quentin ;
Language :	French
Place of the course	Tournai
Prerequisites	<i>The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.</i>
Main themes	<p>An architectural project takes time. First, repetition is needed to move forward. Second, queries and suggestions can develop during the process. Third, the more demanding the situation, the more necessary it is for the architect to clear away pre-conceived ideas to challenge paradigms.</p> <p>With these three conditions, the two Master's level Architectural Design teaching units share the common objective of deepening the knowledge acquired from the Bachelor's course.</p> <p>Understanding the various issues in architecture involves the use of an interdisciplinary approach with a particular emphasis on team work with peers.</p> <p>The issues raised in the workshop range from regions to ergonomics, with the aim of bringing them together in an architectural project.</p> <p>Students will therefore develop programmes which deal with the diversity of inhabited spaces (from individual housing to all types of collective housing) within complex regions.</p>
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
