UCLouvainIvete1262Biostatistics and information's critical
analysis

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

Q1

Teacher(s)	Legrand Catherine ;			
Language :	French			
Place of the course	Louvain-la-Neuve			
Prerequisites	The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.			
Main themes	- Introduction to probability ; discrete (binomiale, multinomial and Poisson) and continuous (normal, chi-square, Student and Fisher-Snedecor) distributions Descriptive statistics (measures of location and dispersion, empirical distribution, histograms, graphs, dependence measures and their graphical representations) - Introduction to statistical inference: point estimation, confidence intervals, hypothesis tests ; application to the comparison of means and variances ANOVA I and ANOVA II models Linear models : linear and multiple regression Simple, partial and multiple correlations Inference methods for discrete data and contigency tables Introduction to the planning of experiments.			
Aims	The goal of that course is to introduce students in veterinary science to the rational use of statistical methods for the analysis of data in their discipline. The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".			
Evaluation methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change. The evaluation includes a theoretical part and a practical part as well as project.			
Teaching methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change. An introduction to a data analysis software will be proposed during the practicals.			
Other infos	Prerequisites: Basic courses in mathematics (PHY1114 - PHY1115 or equivalent).			
Faculty or entity in charge	VETE			

Programmes containing this learning unit (UE)						
Program title	Acronym	Credits	Prerequisite	Aims		
Bachelor in Veterinary Medicine	VETE1BA	7	LMAT1101	٩		
Certificat d'université : Statistique et sciences des données (15/30 crédits)	STAT2FC	7		٩
