

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

5 credits

30.0 h

Teacher(s)	Fillee Catherine ;Gruson Damien (coordinator) ;Haufroid Vincent ;Wallemacq Pierre ;
Language :	French
Place of the course	Bruxelles Woluwe
Main themes	The lecture is organized by a series of oral presentations on recent international papers (Journal Club) or on personal laboratory developments by students in clinical chemistry. It involves an important personal investment of the student (either review of the literature or analytical development/set up). Burning questions could refer on analytic or diagnostic progress, laboratory management, quality assurance, etc Each presentation will raise a discussion supervised by academic members of the Clinical Chemistry department.
Aims	1 Offer to the students candidates specialist in clinical chemistry the possibility to learn recent key progress in the field of clinical chemistry ----- <i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Content	Cfr Scope
Other infos	Prerequisite : possess a solid background in clinical chemistry Evaluation: the oral presentation will be evaluated
Faculty or entity in charge	MED
