Teacher(s)	Bodart Eddy (coordinator) ;Bulpa Pierre ;De Canniere Louis ;Horlait Geoffrey ;
Language :	French
Place of the course	Bruxelles Woluwe
Main themes	In his daily professional and personal activities, the pharmacist is susceptible to be confronted to an emergency situation, that he needs to be able to identify rapidly. The assistance to a person in danger, included in the penal code, is accentuated for every professional, which puts him in the obligation to acquire the specific competency required in these situations. In general, the learning program includes : global analysis of the situation, securing of the area, calling for professional assistance, the administration of first aid and the surveillance of victims while awaiting the arrival of professional assistance. The program equally focuses on the teaching of essential techniques (for example, moving an injured victim in danger to a safety zone, stopping hemorrhagia, dealing with suffocation in adults as well as in children, how to react when faced with a victim who presents a malaise or a cardiopulmonary arrest, a burn, an open wound or any other trauma).
Aims	<p>1 At the end of this course, the practising pharmacist will have acquired the basic skills to be able to adequately react in emergency situations that are frequently encountered in the domain.</p> <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Content	From clinical situations dealt with in an interactive manner during core classes, the students progressively learn how to react when faced with the most frequent emergency situations. Practice of first aid techniques (especially with mannequins and other simulation material) is included in the formation.
Other infos	Pre-requisites : the fundamentals of anatomy, physiology and pharmacology are necessary for an understanding of the concepts discussed and learnt during this course. Study material : the course work is available on the icampus website.
