wsbim2153

2019

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

4 credits	30.0 h	Q1

Teacher(s)	Duque Julie ;Duque Julie (compensates Missal Marcus) ;Legrain Valéry (compensates Missal Marcus) ;Missal Marcus (coordinator) ;Rossion Bruno ;Vandermeeren Yves ;
Language :	French
Place of the course	Bruxelles Woluwe
Aims	*The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".*
Evaluation methods	**Due to the COVID-19 crisis, the information in this section is particularly likely to change.** Written exam or oral presentation.
Teaching methods	**Due to the COVID-19 crisis, the information in this section is particularly likely to change.** Lectures and critical readings of significant papers.
Content	The first theme will illustrate the necessity of a cognitive approach in neurosciene. The historical context will be described and discussed in the second theme. The third theme will be more specific and will study the principal cognitive functions investigated today. At the end of this unit, the student should be able to define the specific approach and contribution of cognitive neuroscience with respect to other approaches in neurosciences. The student should be able to describe the methods of cogntive neurosciences to use as a function of the scientific question being raised. The student should be able to explain dominant theories in cognitive neurosciences and to understand the litterature in this domain.
