

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

10 credits

Q2

Teacher(s)	Kienlen-Campard Pascal ;
Language :	English
Place of the course	Bruxelles Woluwe
Prerequisites	The activity is reserved for students in the 2nd year of the Master, whose application file was selected by the selection committee of the School of Biomedical Sciences. <i>The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.</i>
Main themes	This activity takes the form of a 15-week research internship conducted in a laboratory abroad. The experimental project is left to the discretion of the trainee and the local training supervisor. It is validated by the coordinator of the activity at UCLouvain.
Aims	At the end of this activity, the student will be able to: <ol style="list-style-type: none"> <li>1. Clearly formulate the scientific objective of a research internship and outline the experimental plan for its realization.</li> <li>2. Implement the experimental plan in its host laboratory.</li> <li>3. Formulate and interpret the results obtained.</li> <li>4. Communicate its results in an international context, in the form of a seminar in its host team.</li> <li>5. Present your results in English in the form of a poster at UCLouvain, following the principles of poster presentations presented at international conferences.</li> </ol> <p>-----  <i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Faculty or entity in charge	FASB
