

En raison de la crise du COVID-19, les informations ci-dessous sont susceptibles d'être modifiées, notamment celles qui concernent le mode d'enseignement (en présentiel, en distanciel ou sous un format comodal ou hybride).

5 crédits	30.0 h	Q2
-----------	--------	----

Enseignants	Agrell Per Joakim ;Chevalier Philippe ;
Langue d'enseignement	Anglais
Lieu du cours	Louvain-la-Neuve
Thèmes abordés	This advanced course describes the logistics systems, their managerial objectives and the current trends in the development of advanced decision support systems. In particular, emphasis is put on modeling and solving logistics problems using state-of-the-art approaches. The transportation, distribution and warehousing functions will be studied in details through lectures and case studies.
Acquis d'apprentissage	<p>During their programme, students of the LSM Master's in management and Master's in Business engineering will have developed the following capabilities'</p> <p>KNOWLEDGE AND REASONING</p> <ul style="list-style-type: none"> • Master highly specific knowledge in one or two areas of management : advanced and current research-based knowledge and methods. <p>A SCIENTIFIC AND SYSTEMATIC APPROACH</p> <ul style="list-style-type: none"> • Consider problems using a systemic and holistic approach : recognize the different aspects of the situation and their interactions in a dynamic process. <p>1 WORK EFFECTIVELY IN AN INTERNATIONAL AND MULTICULTURAL ENVIRONMENT</p> <ul style="list-style-type: none"> • Understand the inner workings of an organization : develop a global approach and integrate the internal logic used within the organization. • Position and understand the functioning of an organization, in its local and international socio-economic dimensions and identify the associated strategic issues and operational decisions. <p>TEAMWORK AND LEADERSHIP</p> <ul style="list-style-type: none"> • Work in a team :Join in and collaborate with team members. Be open and take into consideration the different points of view and ways of thinking, manage differences and conflicts constructively, accept diversity. <p>-----</p> <p><i>La contribution de cette UE au développement et à la maîtrise des compétences et acquis du (des) programme(s) est accessible à la fin de cette fiche, dans la partie « Programmes/formations proposant cette unité d'enseignement (UE) ».</i></p>
Modes d'évaluation des acquis des étudiants	<p>En raison de la crise du COVID-19, les informations de cette rubrique sont particulièrement susceptibles d'être modifiées.</p> <p>Continuous evaluation</p> <ul style="list-style-type: none"> • Date: <i>Announced on Moodle</i> • Type of evaluation: <i>Group work (I&II)</i> • Comments: <i>40% of final grade</i> <p>Evaluation week</p> <ul style="list-style-type: none"> • Oral: <i>No</i> • Written: <i>No</i> • Unavailability or comments: <i>No</i> <p>Examination session</p> <ul style="list-style-type: none"> • Oral: <i>No</i> • Written: <i>2 hours (open book and notes), 60% of grade</i> • Unavailability or comments: <i>Continuous evaluation activities will not be organized for the September session, this part of the evaluation for the grade in September will be based on the activities of the semester.</i>

Méthodes d'enseignement	En raison de la crise du COVID-19, les informations de cette rubrique sont particulièrement susceptibles d'être modifiées. The class is mainly analytical and based on modern readings in the area. The sessions are devoted to theoretical discussions of selected aspects and debriefs of cases and assignments. Participants work on two group cases to be submitted and presented orally.
Contenu	<ol style="list-style-type: none"> 1. Introduction to International supply chain systems, economic, time and fiscal criteria 2. Models and methods - Network Optimisation models and methods, - Mixed Integer Programming and decomposition methods, - Heuristic optimisation methods. 3. Design of Logistics Network 4. Design and Operation of Warehouses 5. Planning and Scheduling for Long-Haul Freight Transportation 6. Planning and Scheduling for Short-Haul Freight Transportation
