2020

Animal ecophysiology

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

2 credits	20.0 h + 10.0 h	Q2

This biannual learning unit is not being organized in 2020-2021 !

Teacher(s)	Rees Jean-François ;
Language :	French
Place of the course	Louvain-la-Neuve
Aims	*The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".*
Evaluation methods	**Due to the COVID-19 crisis, the information in this section is particularly likely to change.** The evaluation is carried out on an ongoing basis. After each lesson, participants create two questions relating to the subject matter. These two questions are peer-tested, commented on so that they can be improved. These questions, once validated, are used for the (online) assessment. There is no final exam, except for those who have not achieved the objectives during the semester.
Teaching methods	**Due to the COVID-19 crisis, the information in this section is particularly likely to change.** Lectures, made available on-line
Content	This activity investigates the physico-chemical characteristics of the environment and their impacts on animals. This includes the effects of temperature, pressure, light, availability of water, salts, oxygen availability and pH. The adaptation of organisms to specific ecosystems: fresh / marine waters, intertidal and deep zones, terrestrial environments, deserts, high altitudes, cold environments, ..) will be discussed.
Faculty or entity in charge	BIOL
