

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

5 credits	30.0 h + 30.0 h	Q1
-----------	-----------------	----

Teacher(s)	Hanert Emmanuel ;
Language :	French
Place of the course	Louvain-la-Neuve
Prerequisites	<i>The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.</i>
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods	<b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b> The course assessment is based entirely on a written exam.
Teaching methods	<b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b> There will be one two-hour lecture and one two-hour practical session per week.
Content	The following topics will be covered: <ul style="list-style-type: none"> <li>• Functions of two variables and space geometry</li> <li>• Limits and continuity of functions of two variables</li> <li>• Partial derivatives and tangent plane</li> <li>• Gradient vector and applications of partial derivatives</li> <li>• Extreme values of functions of two or three variables and Lagrange multipliers</li> <li>• Multiple integration on regular domains and Riemann sums</li> <li>• Multiple integration on arbitrary domains</li> <li>• Vector analysis (line integrals of scalar and vector fields, Green and Stokes's theorem, ...)</li> </ul>
