

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

4 credits	30.0 h	Q1
-----------	--------	----

Teacher(s)	Debruyne Emmanuel ;
Language :	French
Place of the course	Louvain-la-Neuve
Main themes	The course deals primarily with the period starting at the end of the 19th century up to the present day, examining the sources closely linked to 20th century history (industrial, demographic and space revolutions) as well as developments in economics, society, politics and culture from the Belle Epoque to the crisis at the end of the 20th century. There are three main objectives. The first is to provide information. The course provides students with information about a number of key events or indicates how this information can be obtained from bibliographical references. The second is to help students to understand. Aside from the events themselves, there are movements and developments whose significance or possible meaning is highlighted. In practical teaching terms, this is achieved through the analysis of cases dealing with the great crises of the 20th century: the Great Wars, the 1921 crisis, the 1929 crisis, the crisis of democracy and the crisis at the end of the 20th century. The third, primarily critical objective is to demonstrate the complex and relative nature of the available information and the precautions which must be taken in using it.
Aims	<p>The primary aim of this course is to adopt a historical perspective and thus a critical distance to today's society, marked as it is by significant technological, social and economic change.. The course attempts to provide students with a historical reading of the contemporary period and in particular of the 20th century, whose roots lie in the break with the Ancien Régime from 1750 on, and in the second Industrial Revolution after the 1880s. It is hoped that giving students a better way of understanding the present, through reading about the past, will better equip them to reflect on the future.</p> <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Evaluation methods	<p><b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b></p> <p>The evaluation will be based on an intermediary evaluation which will count towards a quarter of the score et will be supported by a multiple choice. The January examination will also be supported by a multiple choice and will count towards three-quarters of the score.</p> <p>The evaluation mode is the same for the different sessions, but the examinations of June and Spetember will count towards the whole score.</p>
Teaching methods	<p><b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b></p> <p>The course is build on lectures, supported by a PowerPoint and a bibliography. Depending on the sanitary conditions, the course will be taught in comodality (code yellow), in remote mode (code orange or red) or in the classroom (code green).</p> <p>Four books of this bibliography are namely recommended to the students, but their reading is not mandatory, and the examination will not focus on these books.</p>
Content	<p>The course focuses on the economic and social history of Europe (in constant interaction with the rest of the world), during the period extending from the middle of the 18e century to the present day. It addresses the major changes of Western societies and economies under the influence of the dynamics of modernity and capitalism, both through fundamental phenomena (transport revolution, Industrial Revolution, etc.) and through a periodization allowing to identify the main economic and social developments, also in relation with the major ideological, political and cultural changes.</p> <p>The course is structured on historical chapters sequencing the evolution of societies. It successively addresses the European societies around 1750, the first Industrial Revolution, the rise of industrial capitalism, the second Industrial Revolution, the "Age of Catastrophe" (1914-1945), and the more recent changes (1945-). These chapters also involve some focus exceeding the chronological limits of each of them, and which relate to long-term phenomena (disappearance of slavery, economic crises, etc.) or concepts (economic cycles, world-economy, demographic transition, etc.).</p> <p>The different topics are several times complemented by approaches offering a different perspective, such as the analysis of a work of art in order to emphasize some salient features of socio-economic developments and to put them in connection with cultural history of the societies, or the highlighting of historiographical debates about the meaning given to certain phenomena.</p>

<p>Bibliography</p>	<p>Une bibliographie est fournie aux étudiants. Au sein de celle-ci, trois ouvrages sont particulièrement conseillés aux étudiants pour l'appropriation de la matière:</p> <ul style="list-style-type: none"> <li>• Patrick Verley, <i>La Révolution industrielle</i>, Paris, Gallimard, 2013 (1ère éd. 1997).</li> <li>• Paul Servais, <i>Histoire économique et sociale du XXe siècle</i>, Louvain-la-Neuve, Academia Bruylant, 2000.</li> <li>• Ivan T. Berend, <i>Histoire économique de l'Europe du XXe siècle</i>, 2e éd., Louvain-la-Neuve, De Boeck, 2018 (1ère éd. 2008).</li> <li>• James Walvin, <i>Histoire du sucre, histoire du monde</i>, Paris, La Découverte, 2020.</li> </ul>
<p>Other infos</p>	<p>The first session of this course (presentation and introduction) will be taught in the classroom for the students who follow their first year at the university in 2020-2021. The other ones are invited to follow this first session on Teams. The first chapter will not be taught during the session, but will be recorded and available online.</p> <p>The next sessions will be taught in comodality if the code yellow is hold, half of the students being alternatively in the classromm while the other half follows the course on Teams. More precise intructions will be communicated at the beginning of the academic year, and adapted afterward if needed.</p>
<p>Faculty or entity in charge</p>	<p>ESPO</p>
