30.0 h

Q2

Teacher(s)	Belleflamme Paul ;
Language :	English
Place of the course	Louvain-la-Neuve
Main themes	This course aims at providing a thorough and rigorous analysis of the impacts that the Internet has on the structure of existing markets, the creation of new markets, and the strategies that economic agents (firms, consumers and regulators) deploy on these markets. The tools of the theory of industrial organization are used to understand a wide array of online market phenomena, including multi-sided platforms, impacts of 'big data' (targeted advertising and pricing, recommendation systems, and privacy), and online business models. The course makes use of case studies to make parallels between theory and reality.
Aims	<p>At the end of the course, students should be able to :</p> <p>1</p> <ul style="list-style-type: none"> • master an array of concepts from the theory of industrial organization, so as • understand how the Internet affects the working of markets, • as well as the strategies implemented by firms, consumers and regulators on these markets, and • to apply these theoretical concepts to the analysis of real-life situations. <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Evaluation methods	<p>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</p> <p>The final grade in this course is based on grades in individual coursework (30%), group coursework (40%) and final exam (30%). The contents of the individual and group coursework will be made explicit at the start of the course. If the sanitary situation permits, the final exam will be in person, under the format of a 1-hour, close-book, written exam. Otherwise, the exam will take place online, under the format of a 15 minutes, open-book, oral exam.</p>
Teaching methods	<p>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</p> <p>The theoretical material is presented during the lectures. Students are asked to work in groups and individually in order to apply the theoretical framework to specific case studies and/or to topical issues.</p> <p>In-class activities</p> <ul style="list-style-type: none"> • Lectures • Group discussions and work • Testimonies by external experts <p>At home activities</p> <ul style="list-style-type: none"> • Readings to prepare the lectures • Assignments
Content	The course aims at providing a thorough and rigorous analysis of the impacts that the Internet has on the structure of existing markets, on the creation of new markets, and on the strategies that economic agents (firms, consumers and regulators) deploy on these various markets. The tools of the theory of industrial organization are used to understand a wide array of online market phenomena, including multi-sided platforms, impacts of 'big data' (targeted advertising and pricing, recommendation systems, privacy), net neutrality and online business models. The course makes use of case studies to make parallels between theory and reality.
