

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

2 credits	15.0 h	Q1
-----------	--------	----

Teacher(s)	Edwards Martin ;
Language :	English
Place of the course	Louvain-la-Neuve
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change. The modality of the evaluation is a written report. The report consists of three parts: (1) a summary of a unique case; (2) a description of methods for a research study; (3) simulations of data analyses
Teaching methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change. Lectures
Content	Single case research methods are important for most psychological research domains, whether it be a scientific investigation of a rare clinical case, or a scientific investigation of a person with unique abilities. This workshop will consider the different methods and data analyses available for single case quantitative research. The course starts with a discussion about the value of case research in science. Then, in the first session, I review the different methods of quantitative case research. In the second session, I review the different methods of data analyses.
Inline resources	The Moodle platform
Other infos	The course is given in English. The evaluation of the course can be made in English or French.
Faculty or entity in charge	EPSY

Force majeure

Teaching methods	The courses are made with Microsoft Teams
Evaluation methods	There are no changes.
