

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

2 credits	2.0 h + 28.0 h	Q2
-----------	----------------	----

Teacher(s)	Dehoux Jean-Paul ;Saegerman Claude ;
Language :	French
Place of the course	Louvain-la-Neuve
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods	<b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b> Multiple choice questions written examination
Teaching methods	<b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b> Online cursus
Inline resources	Registration for the Ulg Faculty of Veterinary Medicine online course
Other infos	There is a growing interest in preventing and controlling new introductions of pathogens and diseases into animal herds. Preventing the occurrence of such diseases requires higher levels of biosecurity and requires adaptation of the academic training of veterinarians. The basic principles of biosecurity are: (i) biosecurity aims to reduce the risk of introduction and spread of infection; (ii) people's actions are fundamental in the application of biosecurity and (iii) biosecurity consists of three main steps (isolation, cleaning and disinfection); isolation being the most effective action and disinfection the least effective. Information, awareness and training should start in every university involved in the training of veterinarians
