

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

3 credits	20.0 h + 10.0 h	Q1
-----------	-----------------	----

Teacher(s)	Defour Jean-Philippe ;Jacqmin Hugues ;Mullier François ;Saussoy Pascale (coordinator) ;van Dievoet Marie-Astrid ;
Language :	French
Place of the course	Bruxelles Woluwe
Main themes	<p>Morphology (5 hours) : - Automated counting of the blood cells - Errors in an Haematological Morphology Lab - Quality control (including the evaluation of an automated haematology counter) - Microscopy : principles, special optical systems, electron microscopy - General morphological methods : harvesting, fixation, differentiation, - Special morphological methods : cytochemistry, cytoenzymology, immunocytochemistry, autoradiography</p> <p>Immuno-haematology (5 hours) : - Blood groups - Irregular anti-erythrocyte allo-antibodies - Anti-erythrocyte auto-antibodies - Pretransfusion cross-matching - Flow cytometry : principles and applications</p> <p>Transfusion (4 hours) : - Blood donation - Organization in a blood transfusion centre - Red cell transfusion - Labile and stable blood components - Transfusion complications</p> <p>Haemostasis (6 hours) : - Routine tests in coagulation - Specific quantitative analysis of factor VIII, von Willebrand, IX, XI, XII, and prenatal diagnosis of haemophilia and von Willebrand disease - Specific quantitative analysis of factor I, II, V, VII, X - Dysfibrinogenemia evaluation - Thrombophilic evaluation - Activation markers in haemostasis - Screening and quantitative analysis of natural and pathological coagulation inhibitors - Control of the efficacy of anticoagulant and anti-aggregation treatment - Evaluation of the fibrinolysis and control of thrombolytic treatment</p>
Aims	<p>1 Explanation of the methods used in morphology, immuno-haematology, blood transfusion and haemostasis. Teaching interpretation of the results in relationship with the clinical situations. Quality control and general organization in a Haematology Lab.</p> <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Content	Lecture and practice. Practical teaching of the medical doctors and pharmacists in training, about the medical supervision of the emergency tests (haemostasis, blood transfusion and morphology)
Other infos	Evaluation : -written and oral examination (theory) -practical evaluation after a 6 months training period
Faculty or entity in charge	MED
