

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

3 credits	60.0 h + 45.0 h	Q2
-----------	-----------------	----

Teacher(s)	Becheanu Dorina ;Fillee Catherine ;Gruson Damien (coordinator) ;Haufroid Vincent ;Wallemacq Pierre ;
Language :	French
Place of the course	Bruxelles Woluwe
Main themes	Lectures in the field of statistical methods in clinical chemistry, Lectures provided by clinicians (pancreas, blood gas, inflammatory markers, emergency unit analyses, neurochemistry and LCR, endocrine markers,) Lectures and practice in the field of blood sampling (techniques, sterile aspects, specific populations,). Practice of blood sampling will be organized in the centre of blood drawing under the control of medical staff.
Aims	<p>1 Offer to the students candidates specialist in clinical biology the possibility to learn recent key progress in the field of clinical chemistry, proposed by a panel of lecturers and invited speakers including clinicians from different areas (clinician view point of the medical interest of biomarkers). A specific training in venous blood sampling is offered to students according to legal texts.</p> <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Content	Lectures provided by invited speakers (statistics, methods comparison,) and clinicians (pancreas, blood gas, inflammatory markers, emergency unit analyses, neurochemistry and LCR, endocrine markers,). Lectures and practice in the field of blood sampling (techniques, sterile aspects, specific populations,). Practice of blood sampling will be organized in the centre of blood drawing (cliniques univ St Luc) under the control of medical staff. Each student is required to present orally a journal club from a clinical chemistry paper (new biomarkers, analytical progress, quality controls, guidelines in clinical chemistry)
Other infos	Evaluation : The oral presentation will be evaluated
