

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

4 credits	30.0 h	Q1
-----------	--------	----

Teacher(s)	Cornu Olivier ;Coyette Maude ;Goffette Pierre ;Jacquet Luc-Marie (coordinator) ;Labriola Laura ;Poncelet Alain ;Ribeiro Vaz José Géraldo ;Saussez Thibaud Pierre ;Schubert Thomas ;Tircoveanu Robert ;Wouters Dominique Marie ;
Language :	French
Place of the course	Bruxelles Woluwe
Main themes	Beside an general introduction to biocompatibility, sterile medical equipment, prosthesis and implants used in various medical specialities are addressed.
Aims	<p>1 To get knowledge of the indications and the use of a large variety of sterile medical equipment whose management is under the responsibility of the hospital pharmacist</p> <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Content	<p>- Biocompatibility - Medical equipment, prosthesis and implants used in Anesthesiology (ventilation, perfusion, extra-corporeal circulation), in Invasive Radiology (catheters, embolisation material), in Nephrology (dialysis, renal replacement therapy), in Urology (urinary catheters), in Neurosurgery (drainage, replacement material), in Cardiac surgery (various types of cardiac valves), in plastic Surgery (reconstructive surgery) and Intensive Care Medicine (ventilation, haemodynamic monitoring)</p> <p>- Lecture and presentation of materials</p>
Other infos	<p>- Basic anatomic and physiologic knowledge are required as the lessons are mainly directed towards pharmacists. Some knowledge about frequent pathologies are also useful. - The assessment is based on a written examination that mixes open questions and answers and multiple choice questions. Each co-titular is taking part in the elaboration and correction of the questions. - As the course is mainly dedicated to the presentation, description and the operation of prosthesis, implants and biomaterial, the attendance to the lessons for material visualisation is warmly recommended.</p>
