

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

5 credits

60.0 h

Q1

Language :	French
Place of the course	Bruxelles Woluwe
Main themes	6 integrated parts : internal medicine, surgery, pediatrics, pharmacology, imaging techniques, pathology. The lessons deal with the concise description of the most frequent digestive diseases in adults and children. Diagnostic approach, medical treatment, surgical indications and main surgical techniques are described. Teaching inGI imaging, pathology and pharmacotherapy is provided
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Content	Teaching includes conventional lectures, seminars, clinical demonstrations and training. Power-point presentations, syllabi and short videos are used throughout the course. In addition, live presentations are performed to show the best way for collecting anamnestic data, for establishing a diagnosis by complementary techniques and for treating the patient. Seminars of clinico-pathological correlations and teaching are also given.
Other infos	Written test scheduled at the end of the module of teaching. Oral exam, part of the global integrated control at the end of the year on the base of a written clinical history.
Faculty or entity in charge	MED
