

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

9 credits

Q2

Teacher(s)	De Smet Charles (coordinator) ;
Language :	French
Place of the course	Bruxelles Woluwe
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods	<b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b> Knowledge of the research project and the fields in biomedical sciences it covers will be assessed, on the basis of a scientific report written by the student (pre-thesis) and an oral defense.
Teaching methods	<b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b> For this activity the student will be guided by the promoter of the laboratory internship (WSBIM2197).
Content	At the end of his first laboratory research internship (WSBIM2197), the student will write a scientific report (pre-thesis) describing the context of the research project, its objectives, the experimental approach envisaged, and preliminary results. He will ensure that links are established between his research project and the current knowledge in the concerned field(s) of biomedical sciences.
Other infos	Access to this professional integration activity is subject to contitions (see regulations of the School of Biomedical Sciences).
Faculty or entity in charge	SBIM
