Q2

Langue d'enseignement	Anglais
Lieu du cours	Louvain-la-Neuve
Thèmes abordés	A few topics (around three), in continuation of the macroeconomic courses, will be selected at the beginning of the course. The first lectures will consist in ex-catedra expositions by the professor(s) to introduce to the topics, with the associated advanced literature, key issues and open questions and recommended readings. These lectures will be followed by students' seminars. These seminars will consist of reading reports of one or two related seminal contributions, plus a discussion and eventually an extension proposal.
Acquis d'apprentissage	
Modes d'évaluation des acquis des étudiants	Depending on the number of students, the final exam will be written or oral.
Méthodes d'enseignement	Lectures ex catedra with a maximum of interactions with the students. Focus on understanding mechanisms.
Contenu	The course is divided into two parts. Part 1 introduces the students to the basics of overlapping generations model: the competitive equilibrium, the planner allocation, decentralization a planner allocation, the second best problem Part 2 presents key models to understand the growth process. It includes Malthusian models, Solow's model, from Malthus to Solow, Models with human capital, Unified growth theory
Bibliographie	Part 1: de la Croix and Michel (2002), A Theory of Economic Growth, Cambridge University Press
Faculté ou entité en charge:	ECON
