English for Computer Scientists II

5.00 credits	30.0 h	Q1

Teacher(s)	Meyers Lucille (coordinator) ;
Language :	English
Place of the course	Charleroi
Prerequisites	LANGL1182 *The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.*
Learning outcomes	
Evaluation methods	• **The written exam** guarantees that the students have reached the course's learning objectives. • **Continuous assessment** will be based on class activities and the work and prepartion on the Moodle UCL platform. It will also include a pronunciation test • An eventual **second evaluation session** will be based on the entirety of the course material with a written and oral production.
Teaching methods	This is a flipped classroom class. The first step consists in an comprehensive preparation of the class session by the students, who will have access to documents (texts, videos) on the Moodle UCL platform as well as series of exercises to help them reinforce their understanding of the documents. In class, students will have a chance to ask for clarifications for any questions they may have after the preparation, get exercises to improve some lexical and grammatical points, and participate in speaking activities. Students will also have to prepare a presentation on a subject related to computer science. Training in presentation techniques is also part of the course.
Content	• General and specific vocabulary, grammar, pronunciation • Autonomous reading and listening comprehension of scientific documents related to computer science and the health sector • Mastery of language functions (spoken and written English) commonly used in group interaction and presentations • Interaction in general, academic, and professional contexts • Thematic written production and oral presentation
