Q2

Teacher(s)	Serbest Nevin (coordinator) ;
Language :	English
Place of the course	Louvain-la-Neuve
Prerequisites	LANGL1971 or a course of a similar level, corresponding to the B1+ level of the 'Common European Framework for Languages' (European Council). <i>The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.</i>
Main themes	The course is based on various topics: architecture, civil engineering, electrical grid, skyscrapers, earthquakes, floodgates.
Learning outcomes	<p>At the end of this learning unit, the student is able to :</p> <p>Contribution of the course to the program objectives</p> <p>Regarding the learning outcomes of the program of Bachelor in Engineering: Architecture, this course contributes to the development and the acquisition of the following learning outcomes:</p> <ul style="list-style-type: none"> • LO 4.3, 4.4, 4.5 • LO 5.1 <p>1</p> <p>Specific learning outcomes of the course</p> <p>At the end of the course, the students will have developed the following skills:</p> <ol style="list-style-type: none"> 1. Listening comprehension: B2 level of the 'Common European Framework for Languages' (European Council). 2. Speaking: B1+ level of the 'Common European Framework for Languages' (European Council).
Evaluation methods	<p>Placement test</p> <p>At the beginning of the academic year, all students must take a placement test, of the same level as the final exam. The students who obtain 12/20 or more at this test may be exempted from the course but not from the final written exam. All students must take the final written exam.</p> <p>Final written exam (in week 12 or 13)</p> <p>The final written exam is compulsory and will check whether the objectives concerning listening comprehension and vocabulary have been reached. The final written exam is worth 65% of the final mark.</p> <p>Continuous assessment</p> <p>Continuous assessment will take into account regular class attendance and personal work as well as active participation in group work and in class activities. Continuous assessment will focus primarily on students' oral work. Oral presentations will be made either individually or in a group and must be related to architectural topics. There will be a number of short written tests covering vocabulary and listening comprehension from the self-tuition material. These tests also prepare the students for the exam proper. All the different types of exam questions will be practiced in class beforehand. Continuous assessment is worth 35% of the final mark. Continuous assessment will be taken into account in June only. 3 unjustified absences will automatically lead to the loss of the entire continuous assessment.</p> <p>Second session written exam</p> <p>The September exam will check whether the objectives concerning listening comprehension and vocabulary have been reached. Only the mark of the exam will be taken into account. Continuous assessment will not be taken into account in September. The exam is worth 100% of the final mark</p>
Teaching methods	<ul style="list-style-type: none"> • Analysis of video programmes combining the intensive and global approach. • Miscellaneous conversation activities linked to the topics covered in class. • Interactive oral presentations on an engineering topic.
Content	<p>Students will be able to attend classes, conferences or talks given in English and to grasp, not only the general meaning, but also the important details. Students will also be able to understand spoken English sufficiently well in order to communicate effectively with colleagues in scientific and technical contexts.</p> <p>Concerning spoken English, students will be able</p> <ol style="list-style-type: none"> 1. to conduct a well-structured oral presentation by using appropriate language and presentation techniques, 2. to use basic scientific vocabulary fluently, and

	3. to use everyday language necessary for group work.
Inline resources	Moodle UCL : LANGL1972 English for ARCH12 students.
Bibliography	<ul style="list-style-type: none"> • Syllabus LANGL1972 (disponible à l'ILV). Obligatoire. • A partir du portail UCL, sur Moodle UCL, le cours LANGL1972 - Anglais II pour ingénieurs civils architectes
Other infos	<p>Course attendance is obligatory</p> <p>3 unjustified absences will automatically lead to the loss of the entire continuous assessment.</p>
