The goal is to develop a critical sense and analytical methodology in the study of the classical world (material culture, architecture, sculpture, painting, etc.), to develop theoretical and anthropological concepts in archaeological interpretation but also to be use, through a practical case of study, the methods of geoarcheology, archeometry and digital archeology.</p>
Teaching methods	The course is structured in a series of lectures alternated with seminar sessions around specific issues, decided at the beginning of the seminar. Supplementary activities may be added, varying from year to year: students may be asked to attend lectures and conferences and to submit a critical report; an excursion may also be planned, with personal research followed by an oral presentation on a city or a monument of Antiquity. It can also take the form of an in-depth analysis of scientific papers on a specific topic with presentation (PPT) by the students.
Content	In 2020-2021, the seminar will be focused on the ancient city of Ostia, harbour of Rome. Several aspects of the site will be analyzed, as the architecture, the town planning, decorative elements (paintings, mosaics, sculpture, marble decorations), the geomorphology and the history of a crucial site for the knowledge of Roman civilization.
