	/ain	lbarc1201		Architectural design studio 2 :		
		2021				exploration
[-	20.00 credits	24	40.0 h	Q1 and Q2	

Teacher(s)	Bechet Emilie ;Bulté Marie-Hélène ;Cipolat Francesco ;Delcommune Thierry ;					
Language :	French					
Place of the course	Bruxelles Saint-Gilles					
Prerequisites	es The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teac are specified at the end of this sheet.					
Main themes	The training offered in the Architectural Project 2 workshop explores different facets of architectural work, through a series of projects with defined objectives and in line with the relevant reference points. There is an environmental programme and context to the topics studied:					
	 living in the wide sense of the term (domestic, collective, urban, regional) the constructed environment, in scale with the local area, on defined plots, linked with existing building together with the component dimensions of architectural space : structure, light and material. As part of students'learning about architectural design, the Architectural Project 2 unitbrings together these topics in the gradual process of learning design skills. 					
Learning outcomes	At the end of this learning unit, the student is able to :					
	The general objective of the Bachelor's degree in Architecture is to be able to: - READ (make out, understanding, find the meaning of, distinguish, recognise) - DESCRIBE (represent, draw or follow)					
	- USE (join, combine, order) the basic components of architecture, with sensitivity and understanding of the basic, long-term values which are at the heart of the discipline.					
	Architectural Project 2 achieves this general objective by exploration, following on from the introduction given in Architectural Project 1.					
	Contribution to the learning outcome reference framework: Design a project ' exploration					
	 Sensibly bring together and develop natural and artificial environments (landscape, urban, buildings) within a framework of basic parameters Express and prioritise the aims of the projects so as to be able to make choices Understand, test and bring together the organisation of the space through an architectural project Analyse, consider and invent architectural practices through drawings and models Adopt approaches which are methodical, creative, metaphorical, perceptive, collaborative etc 					
	¹ Test an artistic approach					
	• To imagine, produce and explore various possible avenues to respond to a question					
	Build knowledge of architecture					
	• Be able to use given references which, by analogy, can lead to other interpretations of the context					
	Place the action					
	Experiment with the possibilities of transforming a context					
	Use the technical dimension					
	 Observe and assess the main construction principles of a building. Acquire an instinctive understanding of structures to use in producing a creative work of architecture 					
	Express an architectural procedure					
	• Be familiar with, understand and use the codes for representing space, in two and three dimensions					
Faculty or entity in charge	LOCI
