

28.00 credits		Q2
---------------	--	----

Language :	French
Place of the course	Louvain-la-Neuve
Main themes	Scientific research work, both experimental and bibliographical, carried out in a research team. The internship takes place in a research laboratory (universities, institutes).
Learning outcomes	
Evaluation methods	<p>The evaluation will concern a description of the functioning of the professional environment in which the internship was carried out, the work that was done and a personal evaluation of the integration in the professional environment.</p> <p>The part concerning the work of the trainee concerns the scientific approach and the interpretation of the results more than the results themselves. It will take the form of a written report that will be publicly defended.</p> <p>This report will include three parts :</p> <ul style="list-style-type: none"> - a description of the host structure (composition of the team, fields of expertise, sources of funding for the research work, !), - a description of the scientific work carried out during the internship and a personal evaluation of the experience (adequacy between the training and the proposed work, - a critical analysis of the personal contributions to the work carried out, !)
