Questioning and development fo its own paradigms' <p>At the end of this course, the student will be able to:</p> <ul style="list-style-type: none"> • - The course objective is to provide students with fundamental insights into the core management control principles. Based on a comprehensive understanding, students will be technically able (i) to evaluate the income effects of alternative cost accumulation systems, (ii) to help managers make sound decisions, (iii) to implement those decisions through control procedures, and (iv) to ensure the global coherence between control procedures and the business strategy. Therefore, this course is concerned with both cost accounting and strategic management.- In addition, the course aims to enrich students' management control language, and hence to develop competences of communication.
Evaluation methods	An oral presentation of a group's work with an individual evaluation.
Teaching methods	The course combines, on the one hand, theoretical explanations and exercises and, on the other hand business cases. These business cases aim to initiate students into some pragmatic aspects of management control and to create and feed debates on management control issues faced by professionals today. students will work in groups on a business case. Part of this work will be done during the class. The oral presentation of this work will be done during the exam session.
Content	The content of the course includes the following topics: Part 1. Introduction to management control x Differences between financial and managerial accounting x Vocabulary and concepts of management control professionals Part 2. Cost accumulation for inventory valuation and profit measurement x Job costing system x Process costing system x Activity-based costing system x Income effects of alternative cost accumulation systems Part 3. Information for decision-making x Cost-Volume-Profit (CVP) analysis x Measuring relevant costs and revenues Part 4. Information for planning, control and performance measurement x Budgeting process x Standard costing and variance analysis Part 5. Strategic management control
