Q1

Teacher(s)	Vande Kerckhove Corentin ;
Language :	French
Place of the course	Mons
Learning outcomes	
Evaluation methods	Written exam (session), open questions as practical exercises.
Teaching methods	<ul style="list-style-type: none"> <li>• Main lecture : practical overview of the different tools and models, interactive examples</li> <li>• Guided exercise sessions, related to the lecture, organized in small groups</li> </ul>
Content	<p>During the lecture, students will explore a series of methods and tools typically used in the field of quantitative management methods.</p> <p>The course is divided in two equal parts : a mathematical section and a statistical section. The first part covers the most popular mathematical tools used in management. Every topic is covered by starting with the basic principles to their application in the management world. The second part aims at preparing the students to data analysis and statistical analysis.</p>
Inline resources	<p>Online ressources are available at <a href="https://moodleucl.uclouvain.be/">https://moodleucl.uclouvain.be/</a></p> <p>Lecture name : MQANT1326 - Méthodes quantitatives de gestion</p> <p>Key : communicated at the first class</p> <p>Online tools for function visualization :  <a href="https://www.geogebra.org/">https://www.geogebra.org/</a></p> <p>Online tools for statistical analysis :  <a href="https://colab.research.google.com/">https://colab.research.google.com/</a></p>
