2021

General biology and an experimental approach to biology

| 9.00 credits | 65.0 h + 25.0 h | Q1 |
|--------------|-----------------|----|
| | | |

| Teacher(s) | Demoulin Jean Baptiste (coordinator) ; | | | | |
|-----------------------------|--|--|--|--|--|
| Language : | French | | | | |
| Place of the course | Bruxelles Woluwe | | | | |
| Prerequisites | Prerequisite: French language knowledge, qualities of observation, of intellectual curiosity, of reasoning, of synthesis. | | | | |
| Main themes | In a first part of the course, the cell is studied by closely associating morphology and function. The diversity and evolution of the living is first tackled by the study of meiosis, fertilization and Mendelian genetics. The study of animal evolution from the first animals to modern Man is based on arguments of anatomy and compared embryology illustrating the principle « ontogeny recapitulates phylogeny ». | | | | |
| Learning outcomes | | | | | |
| Evaluation methods | Assessment: Written exam. | | | | |
| Teaching methods | The course includes lectures, practical works and tutorials. | | | | |
| Content | Contents: (this course is given in French) Chapter 1: The chemistry of life Chapter 2: The cell Chapter 3: Cell physiology Chapter 4: Cell communication and signaling Chapter 5: Reproduction and genetics Chapter 6: Cell differentiation and embryology Chapter 7: Evolution Chapter 8: Experimental biology (for biomedical students only). | | | | |
