Language :	French
Place of the course	Bruxelles Woluwe
Main themes	6 integrated parts : internal medicine, surgery, pediatrics, pharmacology, imaging techniques, pathology. The lessons deal with the concise description of the most frequent digestive diseases in adults and children. Diagnostic approach, medical treatment, surgical indications and main surgical techniques are described. Teaching inGI imaging, pathology and pharmacotherapy is provided
Learning outcomes	<b>At the end of this learning unit, the student is able to :</b>  Aims : To teach the main physiopathological concepts in digestive diseases as well as their diagnostic and therapeutic approaches. The importance of each chapter is weighed by the local prevalence of pathologies, and for the less frequent, by the prognostic consequences of an adequate diagnosis and/or management 1 Optional : complements of medical gastroenterology, complements of surgical pathology of the digestive tract in adults and children.
Content	Teaching includes conventional lectures, seminars, clinical demonstrations and training. Power-point presentations, syllabi and short videos are used throughout the course. In addition, live presentations are performed to show the best way for collecting anamnestic data, for establishing a diagnosis by complementary techniques and for treating the patient. Seminars of clinico-pathological correlations and teaching are also given.
Other infos	Written test scheduled at the end of the module of teaching. Oral exam, part of the global integrated control at the end of the year on the base of a written clinical history.
Faculty or entity in charge	MED
