

2.00 credits

20.0 h

Q1

Teacher(s)	Bertrand Luc (coordinator) ;Bommer Guido ;Collet Jean-François ;Demoulin Jean Baptiste ;Rider Mark ;
Language :	French
Place of the course	Bruxelles Woluwe
Prerequisites	Sbim2115 is a prerequisite
Main themes	This course helps to deepen the knowledge on post-translational modifications of proteins. It is the perfect continuation of wsbim2115.
Learning outcomes	
Evaluation methods	Written exam on all parts of the course
Teaching methods	The different parts of the course will be given by lecturers who are specialists in their domains using powerpoint slides. The slides will be available for the students.
Content	General introduction on the importance of post-translational modifications of proteins in their regulation and function (1h L.Bertrand) <ul style="list-style-type: none"> <li>- Mechanisms of disulfide bond formation in prokaryotes and eukaryotes (3h J.-F. Collet)</li> <li>- Protein phosphorylations (4h M. Rider)</li> <li>- The new world of other post-translational modifications (Acetylation, O-GlcNacylation) (4h L. Bertrand)</li> <li>- Mechanisms of targeted proteolysis, protein ubiquitination and related post-translational modifications (J.B. Demoulin)</li> <li>- Protein and metabolite repair mechanisms. (G. Bommer)</li> </ul>
Inline resources	There is no formal syllabus ! PDF versions of slides presented in the course, which cover the subject in a comprehensive way, will be made available on MoodleUCL ( <a href="https://moodleucl.uclouvain.be/">https://moodleucl.uclouvain.be/</a> ). In addition, a tablet will be used to explain certain aspects of the course. The "Tablet" PDF versions of the PowerPoint files will also be made available to students via MoodleUCL.
Faculty or entity in charge	SBIM
