

| Language : | French |
| :--- | :--- |
| Place of the course | Bruxelles Woluwe |
| Prerequisites | The prerequisite(s) for this Teaching Unit (Unité d'enseignement - UE) for the programmes/courses that offer this <br> Teaching Unit are specified at the end of this sheet. |
| Learning outcomes |  |
| Evaluation methods | Knowledge of the research project and the fields in biomedical sciences it covers, and ability to integrate <br> persponal observations into the current knowledge, will be assessed on the basis of a scientific report <br> (thesis) written by the student, and an oral defense. |
| Teaching methods | For this activity the student will be guided by the promoter of the laboratory internship (WSBIM2297). |
| Content | At the end of his second laboratory research internship (WSBIM2297), the student will write a scientific <br> report (thesis) describing the context of the research project, its objectives, and the experimental approach <br> pursued. He will discuss the results obtained and consider future research perspectives. He will propose <br> a critical analysis of current knowledge, with regard to the results he has obtained. |
| Other infos | Access to this professional integration activity is subject to conditions (see regulations of the School of <br> Biomedical Sciences). |
