# English for Computer Scientists II

| 5.00 credits | 30.0 h | Q1 |
|---|---|---|

| | |
|---|---|
| Teacher(s) | Meyers Lucille (coordinator) ; |
| Language : | English |
| Place of the course | Charleroi |
| Prerequisites | LANGL1182 <br> *The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.* |
| Learning outcomes | |
| Evaluation methods | • **The written exam** (60%) verifies that the course objectives have been met. <br> • **Continuous assessment** (40%) is twofold: <br><br> 1. Online preparation work on the MoodleUCL platform, the Flowchase application, and in the syllabus as well as on the degree of participation in the course during the quadrennium. Attendance in the course is mandatory, as is the exclusive use of the English language. <br> 2. A research paper and an oral presentation will be evaluated. Students will be guided in the development and completion of this project. <br> 3. **The second session exam** will cover the entire course and the grade obtained will reflect only the result obtained in this exam without taking into account the continuous assessment. ***It is the student's responsibility to contact the teachers no later than 5 working days after the results are published to find out which parts, if any, need to be re-examined in the second session.*** |
| Teaching methods | The teaching method emphasizes active and interactive student learning and are based on the principle of the flipped classroom. Students are encouraged to adopt a reflective approach to their work and their progress. A typical sequence operates as follows: <br><br> 1. Before the class: preparation of the unit's material through the various resources (see section "course materials") according to the schedule presented on Moodle UCLouvain. <br><br> 2. Class session during which students are asked to apply what has been prepared beforehand through collaborative and individual class activities. <br><br> 3. After the class session, it is the students' responsibility to redo the exercises according to their needs identified during the class sessions (teacher feedback, personal notes...). |
| Content | • General and specific vocabulary, grammar, pronunciation <br> • Autonomous reading and listening comprehension of scientific documents related to computer science and the health sector <br> • Mastery of language functions (spoken and written English) commonly used in group interaction and presentations <br> • Interaction in general, academic, and professional contexts <br> • Thematic written production and oral presentation |
| Inline resources | LANGL1183 course notes (available on Moodle UCL) <br> Moodle course LANGL1183 |
| Other infos | Attendance at class is mandatory. A connected device (tablet/PC/smartphone) is required to actively participate in class sessions. <br> Use of the Flowchase app requires a tablet or smartphone (Apple or Android) with a working microphone and speaker. |
