Analyse de composés organiques dans des matrices complexes

5.00 credits	30.0 h + 45.0 h	Q2

Teacher(s)	Collin Sonia ;				
Language :	French				
Place of the course	Louvain-la-Neuve				
Prerequisites	The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.				
Learning outcomes					
Evaluation methods	Written examination for the theoretical aspects. The experimental know-how and the attitude are assessed throughout practical classes, as well as by a relatively concise report.				
Teaching methods	Magistral lectures for the theoretical part of the course. The polyphenols are used as the typical example in all chapters. The student is also brought to use chromatographic devices in the laboratory. According to the number of students, certain aspects can be approached through the analysis of published papers.				
Content	- Chemical properties used for the analysis of organic traces - Strategy to follow - Extraction and concentration methods - Gas chromatography - HPLC - Derivatization methods - Quantification methods - Semi-preparative HPLC - UPLC - Enantiomeric chromatography				
Inline resources	Moodle				
Bibliography					
Faculty or entity in charge	AGRO
