Q2

Teacher(s)	Hance Thierry ;Wesselingh Renate ;
Language :	French
Place of the course	Louvain-la-Neuve
Learning outcomes	
Evaluation methods	Presentation of a synthesis work in the form of an oral presentation. The evaluation will focus on the group work, the methodology used, the quality of the hypotheses, the data collection, the analysis of the results and their discussion.
Teaching methods	One week field course with overnight stays, usually outside Belgium.
Content	The objective of the terrestrial ecology internship is to develop an experimental methodology in the field based on a hypothesis put forward by the students themselves. In one week, in groups, students develop a protocol to test their hypothesis, collect data, analyze it and produce a synthesis in the form of an oral presentation. The subjects potentially address all fields of ecology with an evolutionary approach.
Other infos	A financial contribution is requested.
Faculty or entity in charge	BIOL
