22.5 h

Q1

Teacher(s)	. SOMEBODY ;Baudoux Nicolas ;Thiran Yves ;
Language :	French
Place of the course	Louvain-la-Neuve
Learning outcomes	
Evaluation methods	<p>This course is evaluated on an ongoing basis during the first quarter. During the term, students will be required to produce a number of assignments, 3 of which will be assessed. Each assignment is due by a specific date. Each exercise is assessed according to a "scale" indicating its quality in relation to the standards expected in a professional environment:</p> <ul style="list-style-type: none"> • A means that the work would be publishable as is (16+), • B means that it would be publishable with minor modifications (13-15), • C means that it could not be published without substantial revision (10-12), • D that it would have to be completely redone (1-9), • E that it is not readable, late or not submitted (0). <p>This assessment is complemented by a short explanatory comment.</p> <p>At the end of the term, these lettered assessments, which conceal a numerical grade, are integrated into a global grade which is the student's grade out of 20.</p>
Teaching methods	<p>Lecture with presentation support accompanied by exercises to be carried out individually or in group.</p> <p>Exercise instructions and feedback via the MoodleUCL course platform.</p>
Content	<p>The "Multimedia Course" consists of a technical update of the students of the Master in Information and Communication and is part of the common core of all the finalities. This introductory course in multimedia design prepares students for the various practical exercises they will have to carry out during their Masters. In concrete terms, the topics covered revolve around the three fundamental media formats, namely</p> <ul style="list-style-type: none"> • Image • Sound • Video <p>For each of these formats, a main evaluated exercise will be associated (with possibly complementary preparatory exercises).</p> <p>At the end of this course, the student will be able to master the various fundamental technical operations necessary to produce a qualitative audio-scripto-visual device, i.e. the capture, processing and arrangement of text, images, sound and video on digital media</p>
