Q1

Teacher(s)	Briet Geneviève (coordinator) ;
Language :	French
Place of the course	Louvain-la-Neuve
Prerequisites	<p>To take this class, the student must :</p> <ul style="list-style-type: none"> • Take the general course B2 LFRAN1401 during the same semester • OR take the ILV placement test B2 organised during the 1st week of each semester and achieved a minimum mark of 14/20 • OR having achieved previously a minimum mark of 10/20 on the general course B2 LFRAN1401 • OR have a recent DALF B2 (maximum 1 year ago) <p>Any request for derogation should be made to the Head of French Department.</p>
Main themes	The different subjects covered during the course are varied (human sciences, sciences, etc') and are adapted to the students' field of specialization. The IMMRID plan (Introduction, Material, Method, Results, Interpretation and Discussion) is used to the various subjects that have been chosen with the participants.
Learning outcomes	<p>At the end of this learning unit, the student is able to :</p> <ul style="list-style-type: none"> • write or give a clear, prepared text or presentation dealing with scientific issues • synthesise information and arguments from a number of scientific sources • express themselves clearly on a large number of subjects of their speciality of studies and express a critical opinion.
Evaluation methods	<p>During the semester (50%):</p> <ul style="list-style-type: none"> • Several written productions, including an article for Wikipedia • Active participation to classes and outside-classroom activity • Several oral presentations <p><i>Continuous assessment tasks may not be submitted (for the first time) after the deadline set by the teacher, unless there is a medical certificate.</i></p> <p>The examination programme (50%):</p> <ul style="list-style-type: none"> • Oral exam: small group oral presentation (during the simulation of a conference) • Written exam: writing a short scientific paper <p><i>An absence (justified or not) from the examination (or any part of it) will result in a final absence mark.</i></p>
Teaching methods	<p>In this course, students are invited to invest the French language in the various situations students, teacher-researcher and/or PhD students encounter in their academic life (receptive and productive situations).</p> <p>The course is conceived on the one hand as a seminar (discovery and collective construction of knowledge) and as a more classical language course (linguistic and technical information given by the teacher).</p> <p>Critical analysis and its expression in French are developed.</p> <p>The teacher is both expert and coach.</p> <p>The course takes place face-to-face, but some activities / sessions could take place on Teams if the distance offers educational added value.</p>
Content	<p>The study of scientific language as well as systematic drills give students a wide degree of autonomy (level B2). Types of activities: specific writing, write an article for Wikipédia, give an oral presentation on complex topics.</p> <p>The intercultural dimension is approached (the characteristics of scientific French vs other languages). During the term, the group attend a public lecture that is followed by a debate.</p>
