Q2

**This learning unit is not open to incoming exchange students!**

Teacher(s)	Rider Mark ;
Language :	French
Place of the course	Bruxelles Woluwe
Main themes	The main themes of this practical are : (i) Titration of acids and alkalies. Experimental pKa determination. (ii) Precipitations and complexations. (iii) Redox titrations. (iv) Illustrative inorganic synthesis (e.g., HCl, NH <sub>3</sub> , SO <sub>2</sub> ...) (v) Calorimetry
Learning outcomes	<b>At the end of this learning unit, the student is able to :</b> 1 It is a basic practical of general chemistry illustrating selected topics of the MD1003 course.
Evaluation methods	Evaluation: continual assessment and an exam in June.
Content	The students are required to participate in the practicals which run through the first and second quadrimesters. The practicals are related to the course of General and Inorganic Chemistry (WMD1105) to illustrate important principles of chemistry: concentration, assays, reactivity (compound synthesis), calorimetry, precipitation. The duration of 30 h of laboratory attendance proposed is obligatory. Support: laboratory manual. Evaluation: continual assessment and an exam in June. The aim is to test the integration of knowledge acquired in the laboratory.
Faculty or entity in charge	FARM
