Q1 and Q2

Teacher(s)	Beuken Guy ;De Jonghe Michel ;de Rouffignac Ségolène ;Dumontier Emilie ;Feron Jean-Marc ;Gilliaux Marc ;Heureux Philippe ;Lamy Dominique ;Minguet Cassian (coordinator) ;Verstraete Bruno ;
Language :	French
Place of the course	Bruxelles Woluwe
Learning outcomes	
Evaluation methods	Peer-to-peer exchanges allow facilitators to assess each participant throughout the year. This evaluation can therefore only be done if the CMG actively participates in the seminars. The presence and / or active participation in an insufficient number of seminars gives rise to a second session during which the candidate general practitioner is questioned orally on the basis of the situations described in the candidate's internship record.
Teaching methods	exchanges between participants, moderated by two approved general practitioners. The participants present to their peers the situations (clinical, administrative, relational, etc.) that they experienced during the course and which either gave them a problem or are illustrative. At the request of the participants, an external resource person may be exceptionally invited to participate in an exchange (health professional, social worker, lawyer, etc.)
Content	All subjects of a clinical nature (prevention, diagnosis, therapy, etc.), practical, administrative, relational, etc. as they are presented to the candidate GP in training within his internship system. The seminar is therefore based on the case study ("casuistry")
Inline resources	As the content of each seminar is very different depending on the situations reported by the participants, specific resources are not mentioned.
Bibliography	same remark as for "Ressources en ligne"
Other infos	The facilitators, legally responsible for the training of the CMG, are available for individual interviews if the CMG deems it useful, regardless of the difficulty encountered during the training.
Faculty or entity in charge	MED
