Thèmes abordés	This course address critical themes that are relevant to the development of identity throughout the lifespan, using a range of theoretical approaches and a developmental perspective at its core. Building upon classic theories and empirical evidences, it will touch upon a range of topics and "layers" of one's identity, including dimensions of personal vs. social identity, the development of personality, possible selves, or gender and sexual identity. The course will also discuss new settings for the formation of identity, including technological and social media innovations which greatly shape the way new generations of youth address their developmental task.
