Q2

Teacher(s)	Schoumaker Bruno ;
Language :	French
Place of the course	Louvain-la-Neuve
Learning outcomes	
Evaluation methods	Written exam for LDEMO2402, and assessment of intermediate presentations and final output (questionnaire module and survey design) for LSOC2095.
Teaching methods	Lectures with many interactions and strong involvement of students through regular productions and presentations (survey presentations, design of questionnaire modules, etc.).
Content	<p>This course covers the principles and methods of designing and organizing sampling surveys in demography and the social sciences. It covers the following elements:</p> <ul style="list-style-type: none"> • The origin and place of surveys in the production of knowledge in social sciences. • The main stages in the design and organisation of a survey (definition of objectives, population, etc.) • Sampling techniques • Questionnaire design • Practical organization of a survey <p>The course includes an important practical component in the LSOC2095 course, which is combined with this course (and is compulsory). In particular, students are required to construct and test a survey module and propose a sample design.</p>
