German Linguistics: Syntax and Morphology of the German Verb

5.00 credits

Q1

| Teacher(s) | Sabel Joachim ; |
|-----------------------------|---|
| Language : | Deutsch |
| Place of the course | Louvain-la-Neuve |
| Prerequisites | 1 |
| Main themes | Study of the problems of the syntax of the German verb. We will especially deal with the aspects that are difficult for francophone students. For example, the positions of finite/infinite verbs (verb-first, verb-second, and verb-last in different finite and infinite sentences), will be discussed from a synchronic and diachronic point of view (and in comparison with French); the specific problems with the acquisition of these verb patterns in Modern High German; the morphological forms of German verbs (auxiliaries, modals, full verbs, participles, and other infinite verbs). |
| Learning outcomes | At the end of this learning unit, the student is able to : At the end of the course, the students should: |
| Evaluation methods | The exam consists of an oral presentation on a theme defined in advance with the student. Part of the final mark will be awarded following submission of an outline of the oral presentation. This short work is due after the "smart" week. In the event of a second session, an alternative form of evaluation will be determined (e.g. written exam on the course content). |
| Teaching methods | The course is a lecture that requires the student's active participation in discussions, in dealing with exercises, and in reading scientific texts. Furthermore, every student has to give a short presentation on the "morphology and syntax of the German verb" at the end of the course. |
| Content | We will discuss the relevant empirical generalizations concerning the positions of the verb in German and we will introduce modern grammatical theories that have been proposed to analyse the German verb patterns. The phenomena that we look at are : word order in German with respect to the position of (finite and infinite) verbs; the connection between verbal morphology and parameters of verbal positions; diachronic development of the changing positions of the German word order with respect to verbal morphology and the position of verbs in first-and second language acquisition; selection of auxiliairies and infinitives in German; separable and in inseparable particle verbs. The students will be invited to present personal work on one of these topics. |
| Other infos | Support. 1. Syllabus, 2. scientific articles/chapters in books, 3. a written guideline for " how to present a linguistic work ", 4. the students get aid with the workout of their presentations (content, structuring, ') during office hours. |
