Place of the course	Louvain-la-Neuve					
Main themes	The different topics are the following:  Organizational justice  Perceived organizational support  Organizational culture  Organizational change  Work in team  Leadership  Please notice that the topic can slightly vary from one year to another.					
Learning outcomes	At the end of this learning unit, the student is able to:  At the end of this training activity, the student will:  Have developed a deep knowledge of several concepts, process and methods relative to organizational behavior;  Be able to apply these concepts, process and methods in order to better understand and analyze varied work situations; and  Have developed an analytic approach of organizational behavior.  Further: see general document as translated					
Evaluation methods	All the modalities related to the certification evaluation are available on the course website on the Moodle platform.  First session: The evaluation covers:  1. 1. Works in sub-groups (oral presentation/written work/active participation) (average of work = 70% of the final grade) 2. Individual written exam (30% of the final grade) The final grade will therefore take into account the achievement and active participation in groups and preparation sessions. For the realization of the individual written work, the use of generative Artificial Intelligence tools (e.g., Chat GPT) is authorized (more details on moodle).  Second session: The evaluation covers: - Individual written exam (case analysis) and an oral exam on the case analysis and course content For the realization of the individual written work, the use of generative Artificial Intelligence tools (e.g., Chat GPT) is authorized (more details on moodle).					
Teaching methods	The course (in French) is based on the active participation of students and alternates:  - Carrying out work in sub-groups of students with teacher supervision  - Oral presentation that are performed in sub-group in front of students and the teacher  - Readings of scientific articles and participation in discussions (questions) related to these articles.  - Lectures (summary)					
Content	Students are invited to acquire knowledge regarding several fundamental concepts and methods used in organizational behavior and to understand the management implications associated. The course considers several levels of analysis: the individual, the group and the organization.
