Means of expression and representation : development

3.00 credits	60.0 h	Q1

Teacher(s)	Llaguno Maider ;Noirhomme Barbara ;				
Language :	French				
Place of the course	Tournai				
Prerequisites	The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.				
Main themes	The method of learning is a progressive one, using areas where the topic to observe or imagine mostly develops from the simplest level to the most complex, but is also repeated. The main topics for analysis are architectural, urban and landscape spaces. Apart from repeated testing of tools and their relevance, and the acquisition of basic skills in material practice and practice of doing a project, students gain greater awareness and memory through observation and analysis as well as individual experience of different media.				
	This teaching unit confirms examination of the ideas behind inhabited space, its features and the properties of architecture made tangible by its representation. It forms part of this process of progressive and cumulative learning. The topics covered in previous units are reviewed and extended:				
	• outline • proportions				
	• composition				
	projections of projected and observed space observational drawing				
	• expressive drawing				
	communicative drawing.				
Learning outcomes	At the end of this learning unit, the student is able to :				
	Students will confirm more advanced means of expression to explore and reveal a current or imagined reality: objects and architectural spaces of all sizes and complexity. They will also be assessed on their ability to achieve, at a more advanced level, the following learning outcomes of the reference framework (Bachelor level):				
	Design a project				
	Analyse, consider and invent architectural practices through drawings and models				
	Express an architectural procedure				
	 Be familiar with, understand and use the codes for representing space, in two and three dimensions Convey the experience of spatiality by observing it and posing questions Test and use relevant means of communication in relation to the target objectives 				
	1 Place the action				
	 Recognise, observe and describe the targeted environments and contexts Analyse the environments and contexts according to various given methods and starting from various identified points of view 				
	In Brussels, students will also be assessed on the following learning outcome, in terms of confirmation: Adopt a professional attitude				
	Organise, plan, develop and bring together the different strands of individual work				
	In Tournai, students will aso be assessed on the following learning outcome: Test an artistic approach				
	 To capture the 'spirit of the time' and identify the means which will enable it to be revealed To test and extend the limit of the imagination 				
Bibliography	Moodle La bibliographie est déposée sur Moodle pour chacune des disciplines enseignées.				
5 1 <i>7</i>	La bibliographic del deposes del modele peri oriadario del disciplina di modele.
