Acquire a knowledge base in quantitative, IT and digital methods. • 2.4. Apply knowledge gained from different subjects to solve a simple but concrete management problem. • 3. Apply a scientific approach: Use a scientific approach to analyse concrete management problems and situations. <ul style="list-style-type: none"> • 3.1. Understand and selectively use scientific texts and works in French and English. • 3.2. Apply clear and structured analytical reasoning, conceptual frameworks and science-based models to describe and analyse a simple but concrete problem and offer a solution. • 3.3. With the help of dedicated software tools, collate, select and analyse relevant information using basic statistical and data analysis methods. • 3.4. Analyse and interpret results or proposals, and provide a well-argued critique, for a simple but concrete management problem. • 3.5. Demonstrate rigour and discernment (validity and relevance) in the collation of information sources, and precision in their referencing. • 6. Become a team player: Become a team member and player. <ul style="list-style-type: none"> • 6.1. Know and understand the principles of collaborative learning. • 6.2. Recognize and take into account the different points of view of team members. • 6.3. Manage group relations in a joint project. • 7. Manage a project: Organise and complete a project, taking into account the pre-defined objectives and the constraints of the project environment. <ul style="list-style-type: none"> • 7.1. Organise the process: working as a team, and with consideration for the pre-defined objectives, plan and develop all the stages of a project and commit to it collectively, having allocated the tasks. • 7.2. Share information and expertise to help progress the project and contribute to the team's success with a view to effectively achieving the objective set. <p>1</p> <p>At the end of the class, the student will be able to:</p>

	<ul style="list-style-type: none"> • define an object or objects of marketing study in relation to a particular management problem. • master the methods and tools of qualitative study in marketing. • master the basic methods and tools of quantitative study in marketing. • implement a complete approach to a marketing study. • produce and present in a synthetic way the results of the marketing study and the managerial recommendations. • understand the specificities of causal studies in marketing. • understand and analyze data from panels. • understand the basics of webanalytics. • evaluate the qualities and rigor of a study proposal or the results of a study carried out by a market research or marketing consulting company.
Evaluation methods	<p>10% Google Analytics Certificate 30% Continuous assessment</p> <ul style="list-style-type: none"> • Collective work in class • -Participation in a marketing research • -Marketing study report <p>-60% - Written exam</p> <p>NB: In case of failure in January, the grade of the continuous control will be automatically postponed to September, only the written exam (60%) can be retaken.</p> <p>Note: In all work for this course (individual or group), sources of information must be systematically cited, in compliance with bibliographic referencing standards. If the student has used a generative AI, he/she is required to systematically indicate which parts of the work have been processed using this tool, adding a footnote specifying whether the AI was used and for what purpose (information retrieval, text writing and/or text correction). Students remain fully responsible for the content of their work, regardless of the sources used. Thus, by submitting a piece of work for assessment, the student affirms: (i) that it faithfully reflects the phenomenon studied, and for this he/she must have verified the facts; (ii) that he/she has complied with all the specific requirements of the work entrusted to him/her, in particular the requirements for transparency and documentation of the scientific approach used. If any of these statements is not true, whether intentionally or through negligence, the student is in default of his/her ethical commitment to the knowledge produced in the course of his/her work, and possibly to other aspects of academic integrity, which constitutes academic misconduct and will be considered as such.</p>
Teaching methods	<p>Courses Reading Case studies Conducting a marketing survey and writing a report Participation in marketing studies/research E-learning</p>
Content	<p>This course aims to introduce you to Marketing Studies</p> <ul style="list-style-type: none"> -The objective is to present a set of methods and tools for the collection and analysis of primary and secondary data -The objective is also to involve you in a market research process -It also aims to make participants conscious of the need to be rigorous - and to give them the tools to do so - with regard to market research and marketing consulting firms, whose services they may need to call on.
