## ECON2MC - Introduction

### Introduction

The master offers:

- an inter-university programme organised within the framework of the ESL Economics School of Louvain (UCL and UNamur), which benefits from the support of the University Cooperation for Development (CUD);
- an overview of economic problems;
- active teaching which integrates the experience of the participants and the socio-economic realities of their country of origin.

### Your profile

The programme is open to students of all countries who demonstrate a strong interest in international economic relations or in the management of the economy of developing countries or ones in transition towards the market economy.

Admission occurs on the basis of an application file to be submitted to the inter-university admission committee: 2nd cycle graduates (min. 300 credits) in economic sciences; 2nd cycle graduates (min. 300 credits) in some other field: their admissibility will be evaluated by the admission committee.

### Your programme

The advanced master in International Economics and Development is a one-year, 60-credit programme. It includes a prep course (5-credit foundation course if the student's earlier education is deemed to be incomplete); courses and seminars split into two fields of study and the writing of a thesis (personal project).

Most of the courses are held in Namur. A day a week, during the 2nd quarter, the courses are held in Louvain-la-Neuve.

## ECON2MC - Admission

***For the specific conditions of this program : refer to the French version***

Decree of March 31st 2004 defining higher education, favoring its integration in the European framework of higher education and refinancing universities.

The admission requirements have to be met at the time of enrolment at the university.

All information can be obtained from the [University's Enrolment Office \(Service des inscriptions – SIC\)](#).

The following students, after meeting the conditions set by the academic authorities, have access to the complementary Master's degree with the aim of obtaining the grade that these studies sanction:

- An academic Master's degree within the same field allowing 2nd-cycle studies, including at least 120 credits
- An academic Master's degree, following a decision by the academic authorities, under the complementary conditions that they set and as a result of a motivated decision by the jury
- An academic grade which is similar to those mentioned above, issued by the Flemish Community, the German Community or the Royal Military Academy, under the same conditions
- A foreign academic grade that has been acknowledged as being equivalent to those mentioned above, in application of this decree, a European-level directive or an international convention, under the same conditions
- Under the same conditions, one or several titles or academic grade issued by the Flemish Community, the German Community or the Royal Military Academy, sanctioning 2nd-cycle studies and valued at least 300 credits by the jury, or sanctioning 2nd-cycle studies and valued at least 240 credits completed of 60 credits, the all that must be valued by the jury according to the decree of March 31st, 2004 (art 54, 5 °)

---

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

## ECON2MC - Information

### Learning outcomes

---

The objective of this programme is to make a contribution to the training of players, both current and future, in economic policy.

The programme is taught entirely in English.

There is a triple approach to the programme. First, it deals with questions of macroeconomic and commercial policy relative to growth and better integration of the economy within the global market. Second, it examines the institutional structures necessary for the effective working of a market economy and the issue of their adequacy for specific national contexts. Finally, it analyzes the effects of various policies on poverty and inequality and studies ways of reducing these problems.

This triple approach is designed to provide students with the most global view possible of economic problems. It aims to enable them to acquire a method of scientific, realistic and original analysis of what is economically, socially and politically possible to promote economic and social progress.

The programme meets the often-repeated demand, voiced by governments, international organizations and the academic community, to find men and women

- capable of proposing and implementing innovative programmes for economic and human development, based on rigorous economic analysis and adapted in the light of both local aspirations and international constraints ;
- capable of understanding and evaluating the models and methods used by international organizations, foreign governments and consultants in development aid and in international economic relations ;
- capable of educating others, particularly in clarifying with local decision makers and the public at large the reason for and the usefulness of economic reforms.

The programme also aims to satisfy the wish of many students and young people in a professional capacity

- to acquire international level expertise in economic analysis and increase their professional skills ;
- to compare their own individual experience with other perceptions of the global economy ;
- to acquire the maturity necessary for a clearer definition of their career or research objectives.

### Teaching method

---

- Main methods to promote interdisciplinarity

This is a disciplinary programme with an original approach for this kind of programme.

- Variety of teaching strategies :

Participation from students in courses and seminars is actively encouraged. Students are required to give various presentations followed by interaction with their audience: these may include a presentation on the current socio-economic in their country, different presentations on the progress of their individual projects.

- Variety of learning situations :

Both in courses and seminars students are frequently faced with issues which they can contrast with those in their own countries. The teaching staff and the guest lecturers all have a wide range of experience and students on the programme come from many different countries and have different professional backgrounds : this means that there is a wide range of issues to be tackled.

The production of an individual project on a theme of students' own choice, most frequently relating to a problem in their own country, teaches students how to gather information, analyze a situation and argue a case with rigour.

### Evaluation

---

Assessment of students is done in different ways : conventional oral or written examinations, group assignments, oral presentations and individual projects. Each lecturer will explain the methods to be used at the beginning of the course.

The weighted average is calculated as follows : 8% for the foundation year, 7% for each course and seminar and 15% for the individual project.

### Mobility and/or Internationalisation outlook

---

This programme is mostly taken by student from developing countries, some of whom benefit from a grant from organizations such as the CUD.

The programme regularly welcomes foreign lecturers, especially those from developing countries (funded by the Southern Chair of the Standing Committee for University Co-operation towards Development - CUD).

## Possible trainings at the end of the programme

---

This programme is a Master following a 2<sup>nd</sup> cycle degree. Exceptionally, some students may go on to a doctorate.

## ECON2MC - Detailed programme

### Programme structure

The Advanced Master in International Economics and Development is an inter-university programme organized in the framework of the Economics School of Louvain (ESL) which groups together the Departments of Economics at UCL and the Facultés Universitaires Notre-Dame de la Paix (FUNDP) in Namur. The programme benefits from the support of the Standing Committee for University Co-operation towards Development (CUD).

Most of the courses are held in Namur. Courses are held at Louvain-la-Neuve one day of the week. (In the detailed programme, the Namur courses are prefixed FUNDP.)

The Advanced Master in International Economics and Development is a programme of 60 credits in one year, taught one year in French and the following year in English. It comprises a refresher course, courses and seminars on three areas of study, optional subjects and the production of a dissertation (individual project).

The details of the programme for the Advanced Master are available at :

- in French <https://www.fundp.ac.be/mc-developpement>
- in English <https://www.fundp.ac.be/mc-development>

The foundation course takes place at the beginning of the first semester. A minimum of three courses are held in the first semester (usually one per module). Dissertations should be completed before the June examination session.
