ESP1PM - Introduction

ESP1PM - Admission

For the specific conditions of this program : refer to the French version

(Decree of March 31st 2004 defining higher education, favoring its integration in the European framework of higher education and refinancing universities)

The admission requirements must be met prior to enrolment in the university.

General conditions

Access to the preparatory year on the basis of a bridging programme:

- Access to the preparatory year for students who have a [non-university "short-type" higher education degree](#)
- Access to the preparatory year for students who have a [non-university "long-type" higher education degree](#)

Upon completion of the Master's admission procedure , students may be required to take extra courses representing a maximum of 60 additional credits. Where the extra workload exceeds 15 credits, this training is considered to be a preparatory year of study.

- **Access to the preparatory year on the basis of [accreditation of prior learning and skills acquired through personal or professional experience](#)** :

Article 53 of the Decree of 30 March 2004 stipulates that: *"Notwithstanding article 51, without prejudice to article 60, and in accordance with a decision by the academic authorities, for the purpose of granting access to Master's studies, the competent Examination Board may accredit prior learning and skills acquired by students through their personal or professional experience. This useful experience must correspond to at least five years of activities, excluding years of higher education study that were not passed. At the end of an assessment procedure organized by the academic authorities, the Examination Board will decide whether a student has sufficient knowledge and skills to successfully pursue Master's studies."*

- **Access to the preparatory year on the basis of accreditation of 180 ECTS credits by the Admissions Board (personalized admission based on application)** for students who have a degree from a Belgian university or qualifications obtained abroad (which do not give access to this particular year on the basis of the abovementioned general conditions).

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

ESP1PM - Information

Learning outcomes

Learning outcomes upon course completion

This year's goal is to allow students who have come from institutions of higher education access to the Master 120 in Public Health (in compliance with the decree of the Government of the French Community setting conditions for access to university studies for students with academic degrees awarded outside universities)

The objectives are as follows:

1. To acquire the disciplinary foundations required to understand the different aspects of health-related problems: medical, social, psychological, psycho-sociological, ethical, legal and economical.
2. To use methods and tools to acquire an academic approach to public health, including the bases for quantitative and qualitative methods.
3. To familiarise oneself with the general problems of public health, the promotion of health and the organisation of the healthcare system.
4. To improve passive understanding of English.

Evaluation

L'évaluation portera davantage sur l'intégration des connaissances que sur leur restitution et devra prendre en considération la spécificité du public d'étudiants : adultes insérés dans des activités professionnelles et des objectifs de cette année d'études préparatoires. Les horaires sont prévus pour être adaptés aux contraintes professionnelles.

Possible trainings at the end of the programme

Additional training available

Successful completion of the preparatory year for the Master's (PM) is required in order to qualify for the Master 120 in Public Health. This year of studies is a non-degree programme.
