Introduction

Admission

For the specific conditions of this program : refer to the French version

Information

Learning outcomes

The program, which amounts to 30 credits, is intended to be an interdisciplinary subject as it offers courses in law, economics, history and civilization and political science. The aims of the course are twofold: equip students with general theoretical training which meets university demand in the field of European integration whilst at the same time providing them with an introduction to what's going on in the European integration process in the 'European current affairs' class, as well as getting students started on documentary research into European affairs.

Possible trainings at the end of the programme

The minor is first and foremost an introductory minor course. Nevertheless, students who have taken the minor in European studies may go on to the Master 120 in European Studies programs (EURO2M).
