Introduction

Admission

This polytechnic minor is essentially intended for students enrolled on the engineering science baccalaureate (civil engineering and architectural civil engineering). The minor is also accessible to students enrolled on the baccalaureates in mathematical, physical or geographical science. Minor activities must be taken in an order that respects the following requirements: - MECA1901 must come before MECA1100 - AUCE 1151 must come before AUCE1152 - AUCE1172 must come before AUCE1173 - AUCE1111 must come before AUCE1801

Information

Learning outcomes

The main objective of the "polytechnic" minors organized by the Faculté des Sciences Appliquées is for a student taking the engineering science baccalaureate, should s/he so wish, to acquire, via a major/minor polytechnic combination, basic training in two specialist areas of engineering science, and thus to broaden his/her range of technical skills, or to prepare for a master's in engineering science which spans the basic courses offered at baccalaureate level. . The multidisciplinary objective of the minor in construction are to allow the student to acquire the majority of basic concepts in the discipline, in particular: Familiarizing him/herself with the theoretical bases of each discipline (construction, mechanical solids, hydraulics, soil mechanics), at the very least those which are vital to follow the master's course. Familiarizing him/herself with the basic tools (modélisation, IT, experimental techniques, etc). Mastering simple applications. The student must gain initial practical experience over the course of his/her baccalaureate studies through practical work and basic projects. Taking a critical approach to the most complex applications and methods which will be revisited on the master's course. Developing analytical, critical and communication skills.

Possible trainings at the end of the programme

For the minor in applied chemistry and physics: the master's in civil engineering in chemistry and material science and the master's in physicist-civil engineering. For the minor in construction: the master's in civil engineering in construction For the minor in electricity: the master's in electrician civil engineer For the minor in IT: the master's in IT civil engineer For the minor in mechanics: the master's in mechanic-civil engineer For the minor in applied mathematics: the master's in civil engineer in applied mathematics For a program which combines a major in electricity/minor in mechanics or major in mechanics/minor in electricity: the master's in electromechanical/civil engineering.

Curriculum Managment

Entite de la structure GCE

Acronyme	GCE
Dénomination	Civil and environmental engineering
Adresse	Place du Levant, 1 bte L5.05.01 1348 Louvain-la-Neuve Tél 010 47 21 12 - Fax 010 47 21 79
Secteur	Secteur des sciences et technologies (SST)
Institut	Institute of Mechanics, Materials and Civil Engineering (IMMC)
Pôle	Civil and environmental engineering (GCE)

Academic Supervisor : [Sandra SOARES FRAZAO](#)

Jury

Président du Jury : **Piotr SOBIESKI**

Usefull Contacts

Secrétariat : **Viviane DELMARCELLE**

Detailed programme

PROGRAMME BY SUBJECT

● Mandatory

△ Courses not taught during 2013-2014

⊕ Periodic courses taught during 2013-2014

⊗ Optional

⊖ Periodic courses not taught during 2013-2014

‡ Two years course

Click on the course title to see detailed informations (objectives, methods, evaluation...)

Year

2 3

○ Contenu de la mineure

● LAUCE1031	STRUCTURAL MATERIALS	Jean-François Cap	15h+15h	3 Credits	2q	x	
● LAUCE1111	Workshop : Project of structure	Jean-François Remacle (coord.), Denis Zastavni	22.5h +22.5h	4 Credits	2q	x	
● LAUCE1152	Hydraulic	Eric Deleersnijder, Sandra Soares Frazao, Yves Zech	30h+30h	5 Credits	2q		x
● LAUCE1171	Geology and mineralogy	Pierre-Yves Bolly, Philippe Sonnet	25h+15h	3 Credits	2q	x	
● LAUCE1172	Soil mechanics	Ramiro Daniel Verástegui Flores	30h+30h	5 Credits	1q		x
● LAUCE1173	Applied soil mechanics	Alain Holeyman	30h+30h	5 Credits	2q		x
● LAUCE1181	Mechanics of structures	Pierre Latteur	30h+30h	5 Credits	1q		x
