## Introduction

## Admission

***For the specific conditions of this program : refer to the French version***

## Information

### Learning outcomes

---

The aim of the minor is to allow students who so wish to include a course of critical reflection on the place of man and woman in society in their baccalaureate training. The program offers a multidisciplinary approach from the first level. Amongst other things, it raises important epistemological questions: it questions the neutrality of knowledge and questions the way disciplines are borne out of the male/female divide.

### Possible trainings at the end of the programme

---

This minor does not provide direct access to a master's. It facilitates the transition on to the Master's in the science of the family and sexuality.
