## ONCO2MC - Introduction

**ONCO2MC - Admission**

***For the specific conditions of this program : refer to the French version***

Decree of March 31st 2004 defining higher education, favoring its integration in the European framework of higher education and refinancing universities.

The admission requirements have to be met at the time of enrolment at the university.

All information can be obtained from the [University's Enrolment Office \(Service des inscriptions – SIC\)](#).

The following students, after meeting the conditions set by the academic authorities, have access to the complementary Master's degree with the aim of obtaining the grade that these studies sanction:

- An academic Master's degree within the same field allowing 2nd-cycle studies, including at least 120 credits
- An academic Master's degree, following a decision by the academic authorities, under the complementary conditions that they set and as a result of a motivated decision by the jury
- An academic grade which is similar to those mentioned above, issued by the Flemish Community, the German Community or the Royal Military Academy, under the same conditions
- A foreign academic grade that has been acknowledged as being equivalent to those mentioned above, in application of this decree, a European-level directive or an international convention, under the same conditions
- Under the same conditions, one or several titles or academic grade issued by the Flemish Community, the German Community or the Royal Military Academy, sanctioning 2nd-cycle studies and valued at least 300 credits by the jury, or sanctioning 2nd-cycle studies and valued at least 240 credits completed of 60 credits, the all that must be valued by the jury according to the decree of March 31st, 2004 (art 54, 5 °)

---

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

## ONCO2MC - Information

### Learning outcomes

---

This programme in the Advanced 2nd cycle is designed to prepare doctors to qualify for the professional status of specialist doctor in medical oncology (Ministerial Decree of 29 May 2006, published on 14 June 2006).

### Evaluation

---

6 monthly clinical assessments: these are organized (in writing) by each candidate's placement supervisor and focus on different areas. Assessments for all the candidates are examined by all the placement supervisors at six-monthly meetings.

#### First part

At the end of the three-year basic training, each candidate is assessed at an interview designed to test their general knowledge of internal medicine. In accordance with the Royal Decree of 16 March 1999, candidates will receive an official certificate to show they have successfully completed a special university training course.

#### Second part

At the end of the three years of advanced training, each candidate is assessed on their in-depth knowledge of oncology. Candidates must also take the inter-university examination organized by the inter-university post-graduate training panel. They must produce a dissertation on a topic in medical oncology and publish an article.

When the above requirements have been fulfilled, the programme committee will award the academic degree of Advanced Master in Medical Oncology.

## ONCO2MC - Detailed programme

### Programme structure

---

Full time training takes six years, including at least three years of basic training in internal medicine and three years of advanced training in medical oncology.

It also includes theoretical training. Advanced training is made up of three years of placement in one or more of the departments approved for training in medical oncology.

The plan for the placement drawn up by the university placement coordinator must be approved by the ministerial qualification committee for the relevant specialization. These placements include duty activities.

### Programme by subject

---

In parallel with the practical training, candidates take a course organized as follows :

#### **Basic training**

Three years, full-time, comprising :

- theoretical teaching
- seminars
- supervised clinical training

The theoretical teaching in the first two years forms part of the special university training.

#### **Advanced training**

To familiarize candidates with all the aspects and methods of diagnosis and the correct administration of systemic cancer treatments and the management of the risks involved, three years, full-time, comprising :

- theoretical teaching :
- advanced issues in Cancerology (INTR3870)
- Belgian inter-university course in medical oncology
  - seminars
  - active involvement in multidisciplinary coordination meetings including surgeons, radiotherapists, anatomopathologists, gastroenterologists, pulmonologists, radiologists, specialists in nuclear medicine, general doctors, psychologists and dieticians.
  - supervised clinical training
  - training in the design and scientific assessment of clinical trials
  - training in the management of medical data, recording cancers and the use of data from the cancer register
